

MySuccess Website Designer Associate Course

Introduction

Receive all the skills necessary to become a professional website designer. First, learn how to create the concept for a website and build a mock design using graphics tools such as Adobe Photoshop CC. We then teach you HTML 5 coding using Dreamweaver CC, where you can turn your design into a working website. After your site is complete, we show you how to publish it for the world to see. At this point we'll prepare you for the Adobe Certified Associate (ACA) in Dreamweaver.

In the third part of this path, we teach you JavaScript and jQuery, which will let you create exciting web 2.0 applications that look and feel like desktop masterpieces.

The Web Designer Associate path is truly all you need to become a professional web designer with a proven skillset and portfolio.
